

PRINT quality FIRST!

Pride of its 25-year experience in the card business, the brand PRINT has become a specialist in printing on adhesives and static cling vinile, metallic and holographic supports, PVC, PST, PET-G, PPL and PET-G lenticular, making use of advanced technologies such as equipment for the offset printing up to 6 colours with UV varnish, and last generation silk-screen printing machines working with both traditional and UV ink. Furthermore, other special processes guarantee the unbeaten quality of our products – for example the hot lamination protecting the card personalization with two overlays – without having to give up more aestetich features: the choice between a matt or gloss finishing, the combination between transparent laminated materials and offset and/or silk-screen printing produce graphic results creating big impression. Trust us, you won't be disappointed!

PRINT CATALOGUE
light version

As market leader in the field of card manufacturing and personalization, PUBLICENTER has grown up thanks to the continuous investment in the development of high technologies and in the research of environment friendly plastic materials.

Over the years, its brand PRINT has specialized in offset and silk-screen printing on plastic materials and other special stuff.

Whatever card personalization requirement you have, from merchandising to a more creative packaging, we bring your ideas into life!
